Tirupur, India

SKILLS

- TypeScript
- Flutter, Dart, GetX State Management
- HTML5, CSS3, Bootstrap, Angular Material
- REST APIs
- SpringBoot
- Angular

TOOLS

- Git
- Postman
- VS Code
- Android Studio

EDUCATION

Bachelor of science: Computer Science

PARK's College, Chinnakarai,

Tirupur - 641605

2019 - 2022

PROFILE

Dynamic Front-End & Mobile App Developer with 2+ years of experience, specializing in Angular and Flutter. Proficient in building responsive, high-performance web and mobile applications with seamless REST API integration. Skilled in crafting intuitive UI/UX designs and delivering scalable, user-centric solutions. Known for strong problem-solving abilities, attention to detail, and a consistent focus on performance and code quality.

EMPLOYMENT HISTORY

VarNik Systems Services Private Limited

JUNE/2023 - PRESENT

Associate Software Developer

Front-End & App Developer – eCommerce, Rental Marketplace, Medical Product Ordering, Essential Grocery Ordering App.

Roles and Responsibilities handled:

- Developed and maintained responsive web applications and websites using Angular, TypeScript, and Angular Material.
- Built and optimized Angular-based applications with a strong focus on performance, scalability, and cross-device responsiveness.
- Integrated RESTful APIs for secure payment processing, product management, and user authentication.
- Ensured optimal API performance through systematic error logging, debugging, and performance monitoring.
- Developed a feature-rich eCommerce Android application using Flutter and Dart, leveraging GetX for efficient state management and smooth user experience.
- Collaborated with cross-functional teams including UI/UX designers, backend developers, and QA engineers to deliver scalable and customer-centric solutions.
- Followed modern development practices including version control (Git), clean architecture, and agile methodologies for efficient project delivery.

MY PROJECTS

E-commerce Website:

Developed a full-featured eCommerce platform from scratch, enabling product providers to upload product images, details, and pricing, with all data managed in a secure database. Designed an attractive, user-friendly interface allowing customers to search products by name, category, or subcategory, place orders, and receive real-time updates. Delivered a seamless experience for both customers and admins by implementing secure authentication, push notifications for order status, and efficient order processing.

Technologies Used: Angular, AngularMaterial, Bootstrap, REST API Integration, Geolocation Services

Location-Based Essentials Ordering App (Flutter):

Developed a mobile application from scratch using Flutter and Dart, focused on daily essential product ordering from nearby shops within a 5km radius. Implemented features for shop owners to register and manage their stores, and for users to browse nearby shops, place orders, track deliveries, and make secure payments. Handled full UI development, API integration, and core functionality using GetX for state management.
