ARUNKUMAR R

Frontend Developer | Angular · TypeScript · RxJS · Flutter

Tirupur, Tamil Nadu, India | +91 96988 77357 | aktechsaviour@gmail.com

Portfolio | **LinkedIn** | **Naukri**

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years in Angular and TypeScript and 2+ years in Flutter, building scalable ERP, POS and eCommerce platforms from scratch, including component libraries, routing, Auth Guards and HTTP Interceptors. Skilled in RxJS, GetX, REST API integration and clean, modular component architecture, with working knowledge of Spring Boot and MySQL for effective full-stack collaboration in Agile teams.

TECHNICAL SKILLS

Frontend	Angular 22, TypeScript, JavaScript (ES6+), HTML5, CSS3, RxJS, Angular Material, Angular Router, Bootstrap, Responsive Web Design
Angular Development	Component Architecture, Modular Architecture, Reusable Components, Auth Guards, HTTP Interceptors, State Management, Reactive Programming
API & Integration	RESTful APIs, REST API Integration, JSON, WebSocket
Backend	Spring Boot (Working Knowledge), MySQL (Basic)
Mobile	Flutter, Dart, GetX, Firebase Crashlytics
Tools	Git, Postman, Jira, Figma, Chrome DevTools, VS Code
Development Practices	Agile / Scrum, Code Review, Debugging, Performance Optimization, Clean Architecture

AI TOOLS

ChatGPT | **Claude** | **GitHub Copilot** | **Google Gemini** | **AI-assisted coding / debugging** | **AI-assisted documentation & code optimization**

PROFESSIONAL EXPERIENCE

QNQ Healthcare Pvt Ltd — Villupuram, Tamil Nadu Nov 2025 – Present

Software Developer (Application Enhancement)

- Developed and maintained ERP and POS systems for live business operations, adding new features and scalable modules across 35+ business modules.
- Designed and built a modern Angular dashboard from scratch using a modular architecture, establishing the folder structure, shared component library and routing architecture the application still runs on.
- Implemented RxJS, Auth Guards and HTTP Interceptors for secure routing and efficient data handling, centralising token attachment and error responses instead of repeating authentication logic in every service.
- Created reusable components and maintained consistent UI/UX standards across ERP and POS applications, reducing duplicated markup and shortening delivery time for each new module.
- Integrated RESTful APIs for authentication, product management and business workflows, working with backend engineers on request/response contracts and error semantics.
- Optimized application performance through debugging, structured error handling and code improvements, cutting initial page load time by ~35% and reducing bundle size by ~20% via lazy-loaded modules and code splitting.
- Collaborated with backend teams to ensure secure and seamless API integration across authentication and transactional modules.

Varnik Systems Services Private Limited — Madurai, Tamil Nadu Jun 2023 – Nov 2025

Associate Software Developer

- Developed responsive web applications using Angular, TypeScript and Angular Material, delivering 75+ screens across enterprise and customer-facing platforms.
- Built and enhanced eCommerce and marketplace platforms with a focus on performance and scalability, supporting 10,000+ active users and 500+ orders/day across the platform.
- Integrated APIs for payments, product management and user authentication, including Razorpay payment gateway.
- Developed Flutter mobile applications using Dart and GetX for efficient state management, delivered via enterprise distribution and Play Store under the organization's developer account.
- Built a location-based essentials ordering app with real-time order tracking and a user-friendly UI, implemented using Firebase Push Notifications, Firebase OAuth and WebSocket for live updates.
- Designed modern mobile UI with reusable components and clean architecture, separating presentation, state and data access.
- Integrated Firebase Crashlytics for monitoring and improving app stability, prioritising the stability backlog from its crash reports and improving crash-free sessions from ~93% to 99.5%, cutting overall crash rate by over 80%.
- Worked closely with UI/UX, backend and QA teams in an agile environment across sprint planning, code review and release testing.

KEY PROJECTS

Employee Attendance Mobile App 2025 – Present

QNQ Healthcare

Flutter-based mobile attendance app for staff across QNQ Healthcare branches, supporting location-based check-in/check-out, shift tracking and real-time sync with the ERP backend for HR and payroll processing.

Stack: Flutter, Dart, GetX, REST APIs, ERP backend integration

ERP and POS Web Platform 2025 – Present

QNQ Healthcare

Modern Angular dashboard for pharmacy and retail ERP and point-of-sale operations, built from scratch on a modular architecture: component library, routing, Auth Guards, HTTP Interceptors and RxJS data flows.

Stack: Angular, TypeScript, RxJS, Angular Material, REST APIs, Spring Boot backend, MySQL

eCommerce and Marketplace Platform 2023 – 2025

Varnik Systems

Responsive multi-vendor web platform with payment gateway, product management and user authentication integrations, built for performance and scalability.

Stack: Angular, TypeScript, Angular Material, Bootstrap, REST APIs

Location-Based Essentials Ordering App 2023 – 2025

Varnik Systems

Cross-platform mobile application with location-aware ordering, real-time order tracking and a user-friendly UI, built on a reusable component library and clean architecture with crash monitoring.

Stack: Flutter, Dart, GetX, Firebase Crashlytics, REST APIs

EDUCATION

B.Sc. Computer Science Jul 2019 – May 2022

Park's College of Arts & Science, Chinnakarai, Tamil Nadu

Certificate — Fundamentals of Python Dec 2022 – Apr 2023

Appex Technology, Coimbatore
